SHENANDOAH TELECOMMUNICATIONS COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. In the opinion of management, the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly Shenandoah Telecommunications Company's financial position as of June 30, 1995 and the results of operations and cash flows for the six month periods ended June 30, 1994 and 1993.

While the Company believes that the disclosures presented are adequate, to make the information not misleading, it is suggested that these condensed financial statements be read in conjunction with the financial statements and notes included in the Company's annual report in Form 10-K.

2. Earnings per share of common stock have been determined by using the weighted average number of shares outstanding during the period.
3. The results of operations for the three-month period ended June 30, 1995 are not necessarily indicative of the results to be expected for the full year.

SHENANDOAH TELECOMMUNICATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Shenandoah Telecommunications Company is a diversified telecommunications holding company providing both regulated and unregulated telecommunications services through its seven wholly-owned subsidiaries.

The regulated local exchange telephone company is the largest subsidiary, accounting for over 60.0% of revenue and 77.6% of net income year-to-date in 1995 (excluding the gain on the sale of equity security). This industry is in a period of transition from a regulated monopoly to a competitive environment with changing technology. As a result, Shenandoah Telecommunications has made and plans to continue to make significant investments in new and emerging technologies.

Other significant services provided are cellular, cable television, long distance, and facilities leased to interexchange carriers on a Company owned fiber optic cable network. The Company also sells and leases equipment, mainly related to services provided.

The Company also participates in emerging technologies by direct investment in non-affiliated companies.

RESULTS OF OPERATIONS

The Company's largest source of revenue continues to be for access to the Company's local exchange network by interexchange carriers. The volume for these access revenues is measured in minutes of use. The minutes of use during the first six months of 1995 increased 4.8% compared to the same period in 1994. Minutes of use during the second quarter were 7.0% higher than the second quarter of 1994. Changes in NECA settlement procedures, effective July 1, 1994, offset the increases in minutes of use. The decrease in billing and collection revenues is primarily attributed to a \$33,192 refund in June 1995 to an interexchange carrier for correcting an error to message counts. Management expects these revenues to decline further when one of the interexchange carriers discontinues using our local exchange company for a portion of the billing process. This change is tentatively scheduled to occur in the last quarter of 1995.

The increase in Mobile Company revenues was due to growth in our cellular operation. Cellular revenues increased 17.6% in the six months of 1995 compared to the same period in 1994. Cellular revenues increased 18.3% over the second quarter of 1994. Year-to-date and for the second quarter of 1995, net additions of customers were approximately the same as net additions for the same period in 1994.

SHENANDOAH TELECOMMUNICATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS (Continued)

The decrease in the ShenTel Service revenues category for both the second quarter and year-to-date is due primarily to a decrease in equipment sales compared to 1994. These sales are down \$118,792 or 28.6% compared to the first six months of 1994. Another factor was the completion of a consulting contract that provided \$12,929 in the first half of 1994. The contract expired in the fourth quarter of 1994. These two items were partially offset by the beginning of a new service in 1995 providing local Internet access to regional communities. This new service provided \$33,398 of revenue during the first six months of 1995.

On September 1, 1994, the cable television company restructured its rates by increasing its rates for basic and premium service and decreasing or eliminating its charges for other services such as rental of converters. As a result of the rate changes and subscriber growth, total revenue for cable television services for the final four months of 1994 increased 17.3% over the previous four months' total, and 26.0% over the final four months of 1993. The number of Cable subscribers has increased 6.8% from June 30, 1994. The increase in the second quarter of 1995 was 2.4% compared to a 3.4% increase in the second quarter of 1994. The Company estimates that our cable rates are within the limits prescribed by the FCC for cable systems of our size. None of the local governments within the Company's cable television serving area have indicated that they will exercise any authority they may have to regulate rates. The Company has recently applied for a franchise to extend the cable television network into an area already served by another cable provider and compete directly with the incumbent provider. Several regulatory approvals must be secured from local and federal governments before construction can begin on the competitive network.

The Company also leases capacity on fiber optic facilities in Virginia, West Virginia, and Maryland to interexchange carriers. The revenue for this activity appears as facilities leases and as network revenues on the income statement. This service experienced a revenue increase of 42.9% year-to-date and 20.0% during the second quarter compared with the same periods in 1994. The increase is due to new circuits being added.

For the first half and the second quarter of 1995, operating expenses increased 5.1% and 4.8% respectively compared to the same periods in 1994.

SHENANDOAH TELECOMMUNICATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS (Continued)

The first operating expense category is cost of goods sold. This category reflects decreases in both the quarter-to-quarter as well as year-to-date comparisons due to the previously discussed decline in ShenTel Service equipment sales.

The plant specific category costs are for maintenance of the company's plant in service. The increases in this category were caused primarily by maintenance to cable in the CATV and Telephone networks. The cable expenses increased \$89,047 or 28.1% year-to-date and \$15,211.37 or 8.8% compared to the second quarter of 1994.

The increases in the network and other category are due primarily to increases in facilities costs for our Cellular operation and the new Internet local access operation. In the second quarter of 1995 the Company added several leased circuits to its Cellular network. These circuits will replace several others that were already in place. This caused a \$25,481 or 10.6% increase in Cellular line costs for the second quarter compared to the same period in 1994. The original circuits will be taken out in the third quarter.

The Internet facilities costs year-to-date are \$49,243 and were \$36,766 for the second quarter of 1995.

The non-operating income less expenses category consists mainly of the income or loss from investments made by the Company. The Company, along with other telecommunications providers, founded an organization that built a fiber optic network in the Richmond, Virginia metropolitan area. The fiber network provided competitive access to businesses in the area. As a result of a strategic change, it was agreed to sell this business to Metropolitan Fiber Systems. The Company recognized a gain on the sale in January of 1995. The amount of the gain was \$872,125. In addition the Company recognized losses of \$103,461 and \$52,270 respectively during the first six months and second quarter of 1994 as our portion of the operations of this organization. During the third quarter of 1995 the Company sold a portion of the MFS stock it received in exchange for this fiber network. The transaction resulted in a pre-tax gain of approximately \$156,000.

SHENANDOAH TELECOMMUNICATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES

The Company continues to generate a strong cash flow from operations that adequately meets the Company's need for cash.

Other available sources of liquidity are two unsecured lines of credit with local banks totaling \$4.5 million. No advances have been made from these lines of credit in 1995. The Company has a loan agreement with the Rural Telephone Bank (RTB) in the amount of \$9,240,000. Advances on this note may be taken until February 1996. The Company expects to receive an additional advance during the third quarter of 1995. As of December 31, 1994, the Company has received advances in the amount of \$3,386,000. Expenditure of these loan funds is limited to approved capital projects for the regulated local exchange carrier.

The Company has reached an agreement to construct and manage part of a network that will provide Personal Communications Services (PCS). The service will be provided under a license held by an unaffiliated company. This will require significant investment in new plant and equipment over the next several years. It is estimated that up to 50.0% of this amount may be financed with loans from external services.

Due to the competition coming from new sources, management is unable to predict the potential impact on the Company's cash flow.

The Company has no material contractual commitments for capital expenditures, however, the Company's Board of Directors has approved a construction budget of approximately \$14,000,000 in 1995. This budget includes the expenditures for PCS discussed above. The remaining amounts are primarily for telephone central office equipment and fiber optic cable facilities. The Company expects to finance these expenditures through internally generated cash flows as well as additional advances from the RTB note.
