

## Glo Fiber Launches 5 Gig Fiber Internet Service

April 4, 2023

*Bringing the fastest internet speeds on a 100% fiber optic network*

EDINBURG, Va., April 4, 2023 /PRNewswire/ -- Glo Fiber, powered by **Shenandoah Telecommunications Company ("Shentel") (Nasdaq: SHEN)**, announces the launch of symmetrical 5 Gig fiber internet service across all of its markets. Over 147,000 homes across Virginia, West Virginia, Maryland and Pennsylvania will have access to the fastest fiber speeds available in these markets.

"Adding 5 Gig internet service to our multi-gig product portfolio allows Glo Fiber to meet the demands of our customers and communities. 5 Gig is a premium residential service designed to connect multiple devices at their fastest possible speeds over a reliable, 100% fiber optic network," said Ed McKay, Shentel Chief Operating Officer.

The average US household now has approximately 20 connected devices, and that number is expected to continue to grow. In addition, with more consumers working remotely long-term, video conferencing is here to stay. Multi-gig speeds are designed for these growing demands and will provide more bandwidth to run a multitude of connected devices at once.

As a leading broadband internet provider in the Mid-Atlantic region, Glo Fiber takes great pride in several key differentiators compared to our competitors:

- Fiber-to-the-home technology with exceptional reliability
- Symmetrical download and upload speeds
- Easy, straight-forward pricing
- Prompt local customer service
