

Glo Fiber Business and CoreSite to Expand Network Connectivity to Washington, D.C.

February 21, 2024 at 4:30 PM EST

EDINBURG, Va., Feb. 21, 2024 /PRNewswire/ -- Glo Fiber Business, powered by Shenandoah Telecommunications Company ("Shentel") (Nasdaq: SHEN), is proud to announce an agreement with CoreSite to securely connect business customers with reliable, scalable colocation services at their Washington, D.C. campus.

The CoreSite colocation will benefit Glo Fiber Business customers by providing a local, direct and secure data exchange in Washington, D.C., ensuring that businesses can seamlessly connect directly to major cloud providers including Amazon, Google, Microsoft, Oracle and IBM. The D.C. campus meets FISMA and FedRAMP deployment requirements, as well as private enterprise standards and data sovereignty laws, making it ideal for government entities, financial institutions and enterprises.

"Glo Fiber Business continues to expand its fiber network reach, data center choices and state-of-the-art services to support our rapid customer growth," said Craig Venable, Vice President of Commercial Sales. "Companies, municipalities and educational institutions of all sizes will benefit from our partnership to leverage peering services and direct cloud connectivity in the CoreSite Washington, D.C. Data Center."

"CoreSite and Glo Fiber Business are aligned in our commitment to deliver mission-critical infrastructure and optimal service to our customers so they can accelerate their time-to-market and improve their competitive edge," said Maile Kaiser, Chief Revenue Officer at CoreSite. "Working with Glo Fiber Business will provide additional fiber connectivity to our customers while Glo Fiber Business customers will be able to take advantage of the robust ecosystem, enhanced connectivity and cloud access offered by CoreSite."

Glo Fiber Business is known for its outstanding local customer service, best-in-class reliability and a wide range of industry-leading services and connectivity options throughout Virginia, Pennsylvania, Maryland, West Virginia and Kentucky.

The CoreSite Washington, D.C. data center campus provides data center services, colocation services and meet-me-room facilities to customers throughout the region. The CoreSite campus also facilitates the secure interconnection of domestic fiber networks, cloud and AI providers throughout the United States.
