THE ELECTION OF DIRECTORS

Directors Standing for Election

The amounts shown as estimated annual pensions were calculated on a straight-life basis assuming the employee retires in 1999. The Company did not make a contribution to the Retirement Plan in 1998, as the Plan was adequately funded. Christopher French, David Ferguson, and William Pirtle had 17 years, 31 years and 6 years, respectively, of credited service under the plan as of January 1, 1999.

COMPENSATION COMMITTEE REPORT ON EXECUTIVE COMPENSATION

The members of the Personnel Committee of the Board of Directors of the Company perform the function of a Compensation Committee. The Committee's approach to compensation of the Company's executive officers, including the chief executive officer, is to award a total compensation package consisting of salary, annual and long-term incentives, and fringe benefit components, which recognizes that the compensation of executive officers should be established at levels which are consistent with the Company's objectives and achievements. The compensation package, and the Committee's approach to setting compensation, is to provide base salaries at levels that are competitive with amounts paid to senior executives with comparable qualifications, experience, and responsibilities. The annual incentive compensation is approved upon achievement of corporate objectives. The longer-term incentive compensation, consisting of the Company's Incentive Stock Option Plan, is closely tied to the Company's success in achieving increases in the Company's stock price, thereby benefiting all shareholders. The Committee reviews industry compensation surveys, and compares compensation data from public filings by other publicly held companies in our industry and market region. In setting the compensation of the executive officers other than the Chief Executive Officer, the Committee receives and accords significant weight to the input of the Chief Executive Officer.

The Committee has recognized the success of the Company's executives in accomplishing the Company's various strategic objectives, and has taken into account management's commitment to the long-term success of the Company. The Company has continued to expand its product and service offerings and has also continued its expansion beyond its traditional geographic base. The Company has also continued to focus its efforts on increasing earnings and

on providing superior customer service while controlling operating costs. These actions in turn will assist the Company in meeting the challenge of achieving growth in an increasingly competitive telecommunications industry. Based upon its evaluation of these and other relevant factors, the Committee is satisfied that the executives have contributed positively to the Company's long-term financial performance.

The annual base salary of the Chief Executive Officer is determined by the Committee in recognition of his leadership role in formulating and executing strategies for responding to the challenges of our industry, and the Committee's assessment of his past performance and its expectation for his future contributions in leading the Company. The 1998 base salary was not set in response to attainment of any specific goals by the Company, although the Committee took into consideration his individual contributions to the Company's performance, reflected by the 25% increase in operating income and net income.

The annual incentive plan stresses improvement in both financial performance, as measured by increases in net income, and service provided to the Company's customers, as measured by trouble reports from customers. Specific target goals are set each year. In 1998, as a result of its large increase in earnings and significant improvement in service, the Company reached over 165 percent of its combined goals. These improvements resulted in increases to incentive payments made to the Company's president and other executive officers.

The long-term incentive plan involves most employees of the company, and incentive stock options are currently being granted on a formula related to base salary. Rewards under this plan for the executive officers, as well as all participating employees, is dependent upon increases in the market price of the Company's stock.

FIVE-YEAR STOCKHOLDER RETURN COMPARISON

The Securities and Exchange Commission requires that the Company include in its Proxy Statement a line graph presentation comparing cumulative, five-year stockholder returns on an indexed basis with a performance indicator of the overall stock market and either a nationally recognized industry standard or an index of peer companies selected by the Company.
